SUMMARY

Computer Science & Engineering student (B.Tech, CGPA 8.13/10, graduating 2027) specializing in Java and Spring Boot backend development. Built 3 projects covering REST API design, Spring Security authentication, MySQL data handling, and full-stack integration with React.js, Flutter and Firebase. Named co-inventor on a design registration for AI interview hardware, and builder of a mobile prototype for the IIT Bombay e-Yantra Innovation Challenge. Seeking a Software Engineer Intern / Java Backend Developer role to build scalable, secure and user-focused applications.

EDUCATION

Bachelor of Technology (B.Tech) in Computer Science & Engineering **CGPA: 8.13/10**
Sharad Institute of Technology, Ichalkaranji, Maharashtra 2023 – 2027

HSC (Science) **2022 – 2023**
Dr. D. Y. Patil Jr. College of Arts, Commerce & Science, Pune, Maharashtra

ACHIEVEMENTS & CERTIFICATIONS

Design Registration Certificate | Co-Author **Jan 2026**
- Co-authored 1 registered design for an AI-Powered Intelligent Interview and Candidate Evaluation Device, collaborating with co-inventors on concept and documentation.

e-Yantra (IIT Bombay) Innovation Challenge | Participant **Jan 2025 – May 2025**
- Developed and submitted 1 mobile application prototype (PATH) in the 2024-25 edition of the national innovation challenge.

Professional Development
- Certified in Web UX Design for High Converting Websites (Frontend Masters).
- Certified in Complete Professional Development Soft Skills (GFG).

ACADEMIC PROJECTS

Airline Reservation System **Jun 2026 – Jul 2026**
Technologies: *Java, Spring Boot, MySQL, REST APIs, Postman*
- Engineered a Java and Spring Boot backend managing 3 core workflows: flight booking, passenger management and payment processing.
- Implemented RESTful APIs for reservations, passenger records and transactions, and validated them across 20+ Postman test scenarios.
- Wrote MySQL queries across 3 workflows to keep passenger and transaction records consistent and accurate.
- Structured the application into controller, service and repository layers to keep the codebase modular and maintainable.

BusinessLog – Full-Stack Business Management System **May 2025 – Jun 2025**
Technologies: *Java, Spring Boot, Spring Security, Hibernate, MySQL, React.js, Docker*
- Developed a decoupled full-stack application across 2 GitHub repositories, with a Spring Boot backend and React.js frontend for user and sales-record workflows.
- Delivered 6 REST API endpoints supporting 4 CRUD operations and tested them in Postman, covering user registration, login, validation and error handling.
- Configured Spring Security, CORS and request authorization to secure API access between the client and server.
- Integrated the React client with the backend using Axios and React Router (3 routes, 2 reusable components).

Public Assistant Transportation Hub (PATH) **Jan 2025 – May 2025**
Technologies: *Flutter, Firebase, GPS Tracking*
- Built 1 public transit mobile application with Flutter and Firebase to improve transportation accessibility for commuters.
- Implemented real-time user tracking with Firebase synchronization, giving commuters live location updates and reducing tracking latency.

TECHNICAL SKILLS

- **Programming Languages:** Java, Python, SQL
- **Backend & Web:** Spring Boot, Spring Security, Spring Data JPA, Hibernate, REST APIs, CRUD, Authentication & Authorization, CORS, React.js, React Router, Axios
- **Databases & Cloud:** MySQL, MongoDB, Firebase
- **Tools & DevOps:** Git, GitHub, Docker, Postman, Cisco Packet Tracer
- **Core Concepts:** Data Structures & Algorithms, Object-Oriented Programming, Software Engineering, Web UX, Conversion Rate Optimization (CRO)
